Hello Ms. Reyes

My name is Lucas Garcia Cornejo and me and my engineering group came in last week, asking for you to be our groups mentor on our back support project, and now we are assigned to ask for your approval for our project.

Attached below is a CAD file of the back insert that will be put into backpacks to support backs and prevent back pains caused from unsupported backpacks. We would value your expertise on the topic and if this back insert would be viable for use.

Thank you,

PLTW Engineering Students
